The current User Manual covers the issues concerning the installation, running and troubleshooting of the Praktika HICAPS Module that enables Praktika to work with the HICAPS terminal.

1. Praktika

Praktika is a Dental Practice Management System software package developed specifically for the Australian dental industry. It follows the SaaS (Software as a Service) Model where both the application and data are supplied over the Internet.

Praktika is a cross platform browser based application, that does not require any specific setup or installation on a client's computer. All it needs to run is a web browser and a broadband Internet connection.

Now Praktika is capable to work with the HICAPS terminal.

If several computers running Praktika are joined in a local area network (LAN), then they all can share a single HICAPS terminal.

To start using Praktika with the HICAPS a special software module needs to be installed. For the installation instructions, please refer to the Installation chapter of the current User Manual.

2. HICAPS

Health Industry Claims And Payments Service. The company responsible for the switching of transactions to health funds from the terminal. HICAPS is Australia's leading electronic claiming service, providing members of participating health fund the convenience of electronic claims (health fund and Medicare Easyclaim) processing and payments at the point of service.

HICAPS comes with a terminal, which can be operated through the build-in interface or through an external interface provided by a Practice Management System. In our case, such interface is provided by Praktika.

For all the questions regarding the operations of the HICAPS terminal, software and services, please refer to the HICAPS Terminal User Guide, provided by HICAPS.

Fast claims... on the spot

3. Glossary of Terms

benefit	Value of rebate authorised by a Health Fund.
cancel	Reverses a transaction processed through the terminal.
card	A membership card issued by the Health Fund or an EFTPOS or credit card, issued by a bank.
claim	After treatment is provided, details are sent electronically via the terminal to the Health Fund.
claim declined	When a Health Fund declines to pay the request a brief response message will print with each declined item and/or claim.
claim receipt	Either the terminal or the associated Practice Management System prints a receipt, which must be signed by the patient to acknowledge services and approve the transfer of payment to the provider.
claim to sale	The terminal facility allowing you to start an EFTPOS transaction using the Gap amount returned from the HICAPS Claim.
clinical code	Two digit numeric identifying the body part/primary condition/ diagnostic intervention on which the service was performed.
date (of service)	The date the specific item of service was performed – format ddmm.
fallback	The terminal was unable to contact the bank to process an EFTPOS transaction, but the transaction has been approved/declined and will be sent to the bank with the next transaction.
gap payment	The amount remaining after the Health Fund has approved a benefit or the specified services.
HICAPS	Health Industry Claims And Payments Service. The company responsible for the switching of transactions to health funds from the terminal.
issue date	The date the membership card was issued. Those cards with issue dates have them printed on the bottom right-hand corner of the card.
item cost	The amount charged for the given item of service.
item number	Numeric code identifying the type of service performed. Refer to the HICAPS Quick Reference Guide or the relevant schedule for a full list of item numbers.
member	A customer of a Health Fund.
MMF	The Multi-Merchant Facility. This is a feature of the HICAPS terminal which optionally allows you to settle the EFTPOS funds separately for each provider.
patient	iDA member listed on the card which identifies a given patient within a Health Fund membership.
Practice Management System	The PC-based system which allows a transaction to be sent directly to the HICAPS terminal.
Praktika	Dental Practice Management Software Package design to automate record keeping at a dental practice
provider	Practitioners who provide Health Services to patients.
provider numbers	eight characters that uniquely identify each individual provider for a specific location. Provider numbers that HICAPS use are issued by Medicare Australia or Medibank Private. Provider numbers are location specific, so you must have a provider number for each location you wish to practice at.
refund	Refunds a previous EFTPOS or credit approved transaction.
reversal	Reverses an approved transaction on the same day the transaction was processed.
RRN	Receipt reference number (unique 12 digit field)
swipe member card	Pass the membership card through the card reader on the right-hand side of the HICAPS terminal.
tooth number	Two digit FDI numeric identifying the tooth on which the service was performed.

4. Installation of Praktika HICAPS Module.

4.1. System Requirements:

Praktika can run on any modern operating system, including Microsoft Windows, Mac OS X, Linux and UNIX. However, to be able to connect to a HICAPS terminal you have to use a personal computer with a Microsoft Windows operating system. You can share the terminal with other computers running various operating systems (including Mac OS X) on a local area network.

4.1.1. To install and run HICAPS terminal you need:

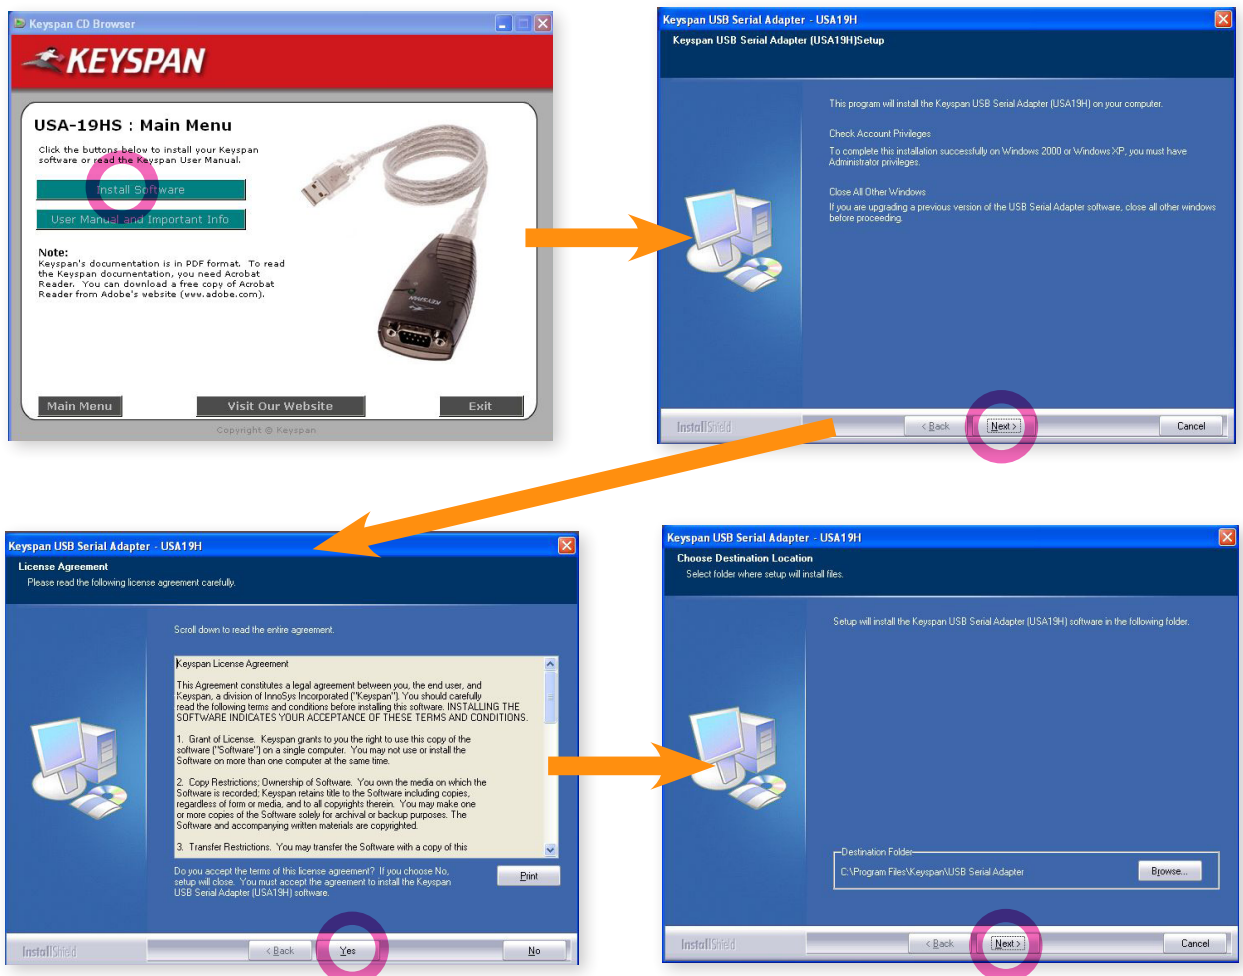

- a personal computer with Microsoft Windows operating system (XP, Vista, 7, Windows Server 2003 and 2008)
- at least 2GB of RAM
- a serial port on your computer. If a serial port is unavailable (most of modern PCs come without a serial port), then you need a Keyspan High Serial USB Serial Adaptor (USA-19HS) to connect the HICAPS Terminal to an USB port of your computer..

Note: you can run Microsoft Windows operating system on an Apple's iMacs by installing Parallels software.

4.2. Installation:

4.2.1. To install the HICAPS terminal perform the following actions in the given order:

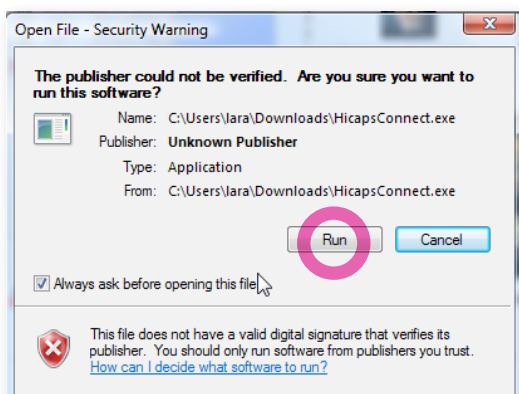

- 4.2.1.a. Install the Keyspan High Serial USB Serial Adaptor drivers from the supplied disc
Follow the driver installation screen instructions.

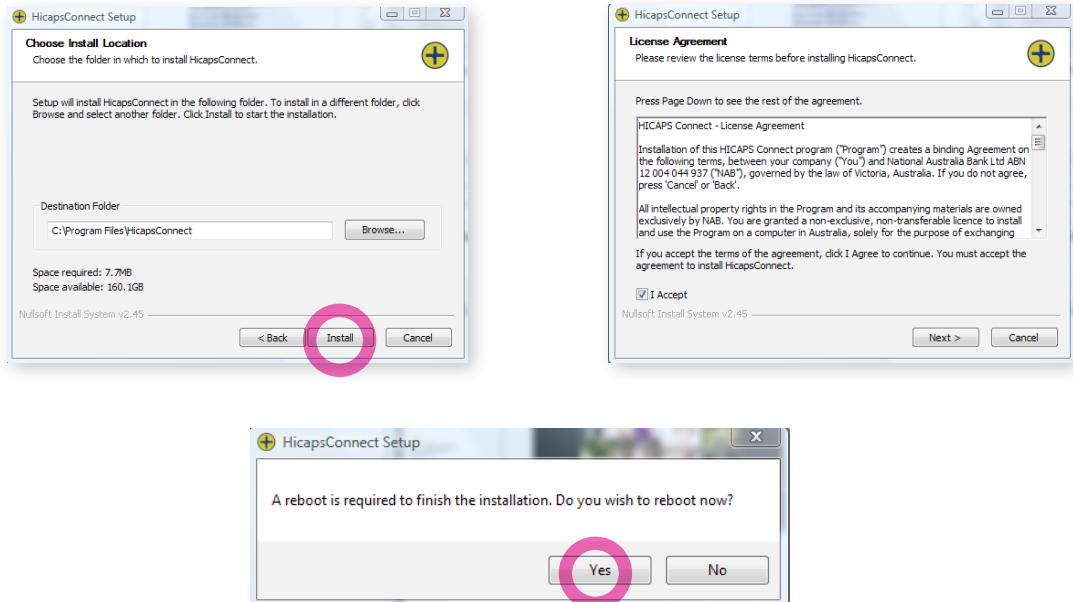

- 4.2.1.b. Connect the Terminal to USB port of your computer with the Keyspan adaptor and turn the Terminal on.
- 4.2.1.c. Install the HICAPS network connect driver.
For that, download and run the **HicapsConnect.exe** file from the following web address:
<http://praktika.com.au/hicaps/HicapsConnect.exe>

Windows security settings may try to prevent **HicapsConnect.exe** from running.
To continue with the installation, press the "Unblock" button.

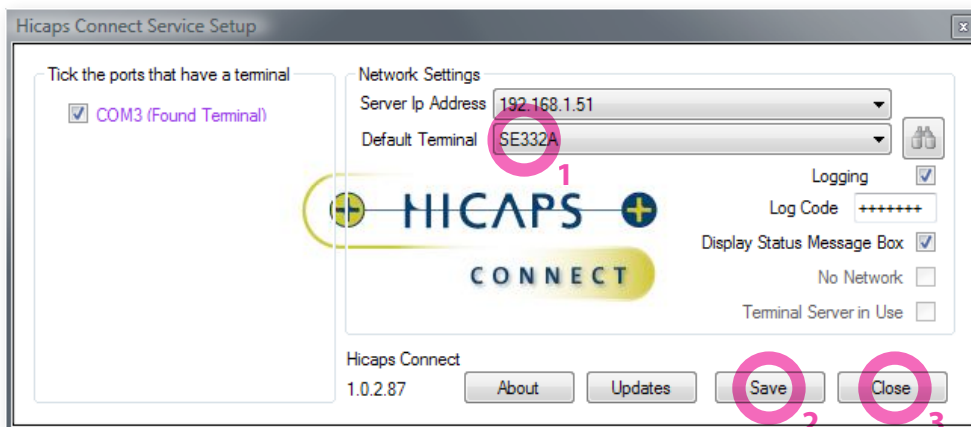

Restart your computer after the driver has been successfully installed.

Once installed the HicapsConnect displays the HICAPS icon in the bottom panel of the computer screen

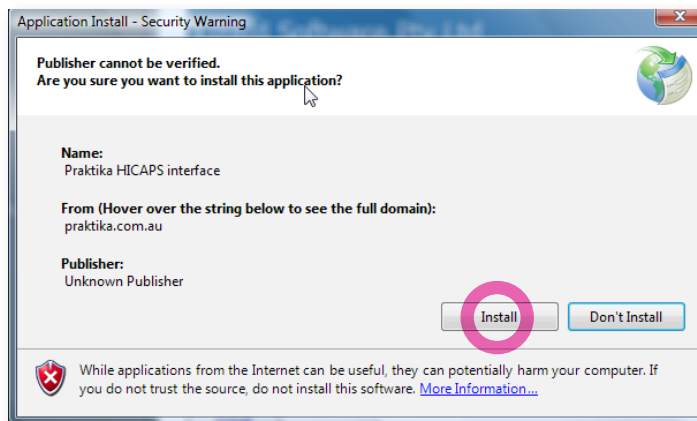

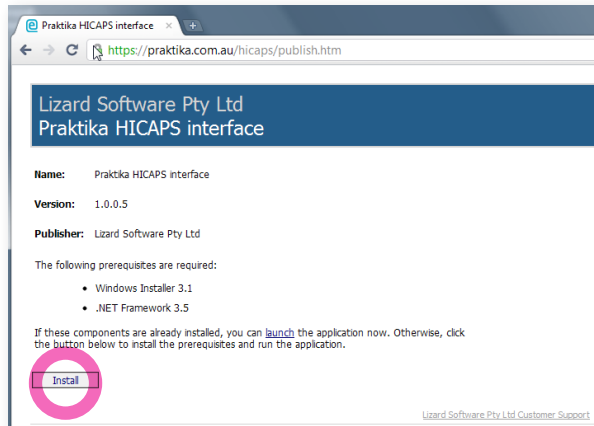

- 4.2.1.d. Select the Default Terminal In the HicapsConnect screen (1). The id number of your terminal can be found on its body.
Save your settings (2) and close the screen (3).

4.2.1.e. Install the Praktika HICAPS Module.

For that, download and run **setup.exe** file from the following web address:

http://praktika.com.au/hicaps

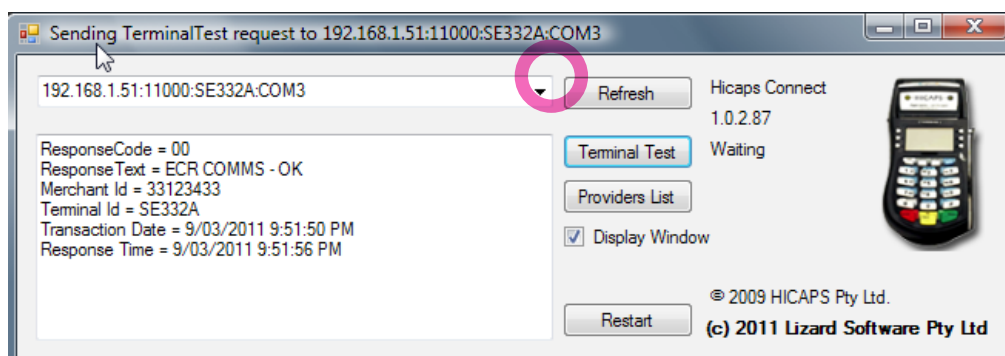

4.2.1.f. Start Praktika HICAPS Module

For that, click on **Start** button (left bottom of Windows screen)

Then go to **Programs - Lizards Software Pty Ltd - Praktika Hicaps Interface**

4.2.1.g. Test the connectivity with the terminal. If test show OK, the installation is complete.

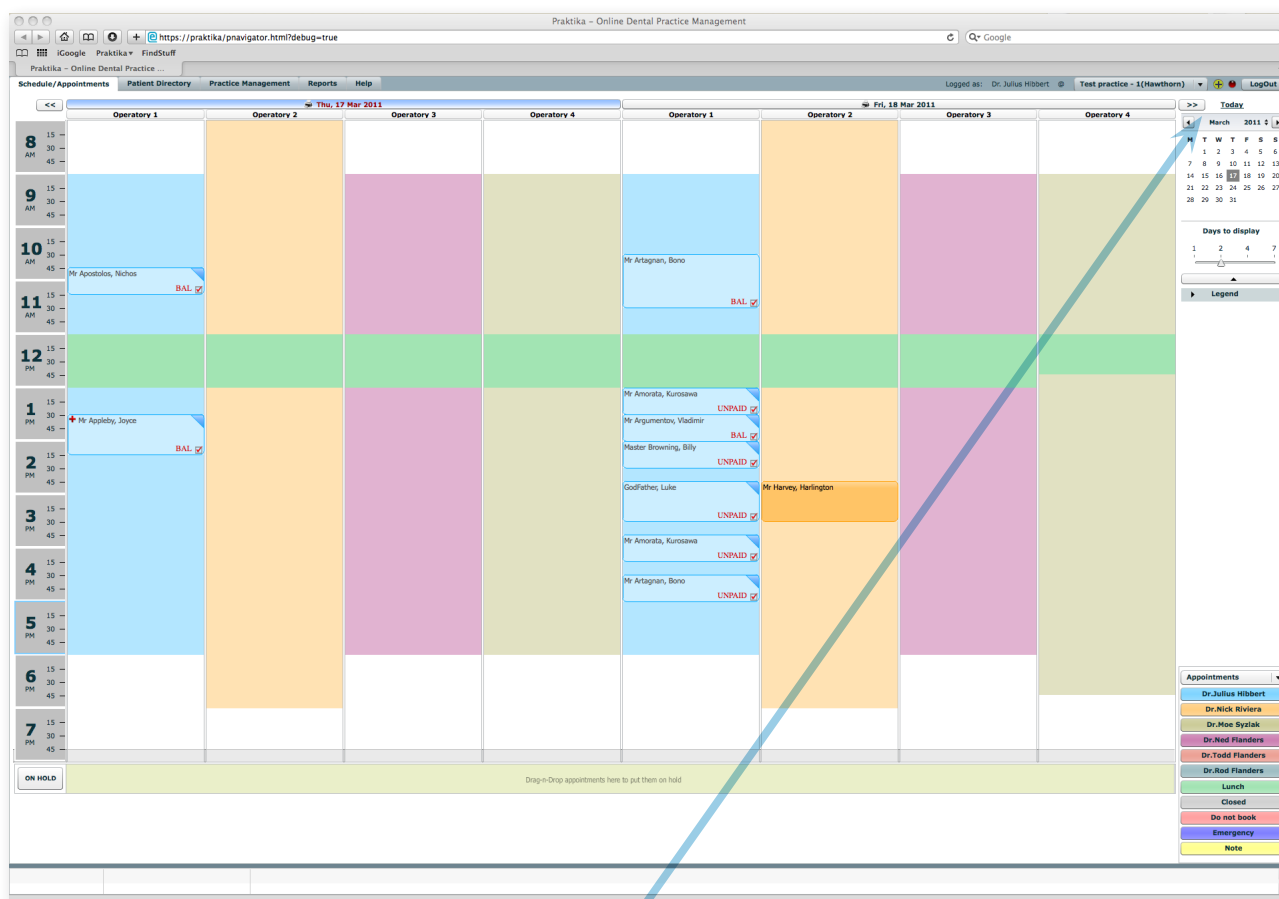

5. Using Praktika HICAPS Module

5.1. Checking the connection to the HICAPS Terminal

Once the HicapsConnect and Praktika HICAPS Modules are installed and are running, start Praktika. Refer to the **Installation of Praktika HICAPS Module** items 4.2.f and 4.2.g to see how to start Praktika HICAPS Module.

Praktika screen has a visual indicator displaying the status of your HICAPS connection. If the red indicator is not turning green after 30 seconds, the connection has not been established and you need to restart Praktika HICAPS Module

no connection

connection is OK

5.2. Using HICAPS Terminal on other computers

If you want to use your HICAPS terminal from any other computer on your local network, click on the Hicaps indicator in the top right corner of Praktika screen, enter and the IP address of the computer with the attached terminal in the popup screen and wait till the button turns green. The operation on such computer are the same as on the computer that has the HICAPS Terminal directly attached to its USB port.

6. Making Medicare Easy Claims through HICAPS Terminal with Praktika

6.1. Setting up the patient file for Medicare processing

6.1.1. Go to the Patient's Personal Details screen and make sure the following data are entered:

- Medicare Number

(if the entered Medicare Number is valid, the input field should display light green background, if it is invalid, the background will be light red).

Personal Details Top > Patient File

6.2. Appointment creation and completion stage

Creation and completion of appointments for Medicare EasyClaim is the same as for other payment types.

1:45 PM	LUNCH	1:45 PM
	Mr Ackles, Jensen (Jen)	2:00 PM
		2:15 PM
		2:30 PM
	2:45 PM	2:45 PM
	3:00 PM	3:00 PM

6.2.1. Create Appointment in the Scheduler

6.2.2. Add Treatment items into the Appointment.

When adding the treatment it is advisable to use one of Medicare Fee Schedules as they contain procedure codes applicable to the Medicare Claims. If you have not got a Medicare Fee Schedule - create one by clicking on the New Fee Schedule button in the Management Section and choose one of the Medicare types.

There are several Medicare related fee schedules. Select an appropriate one.

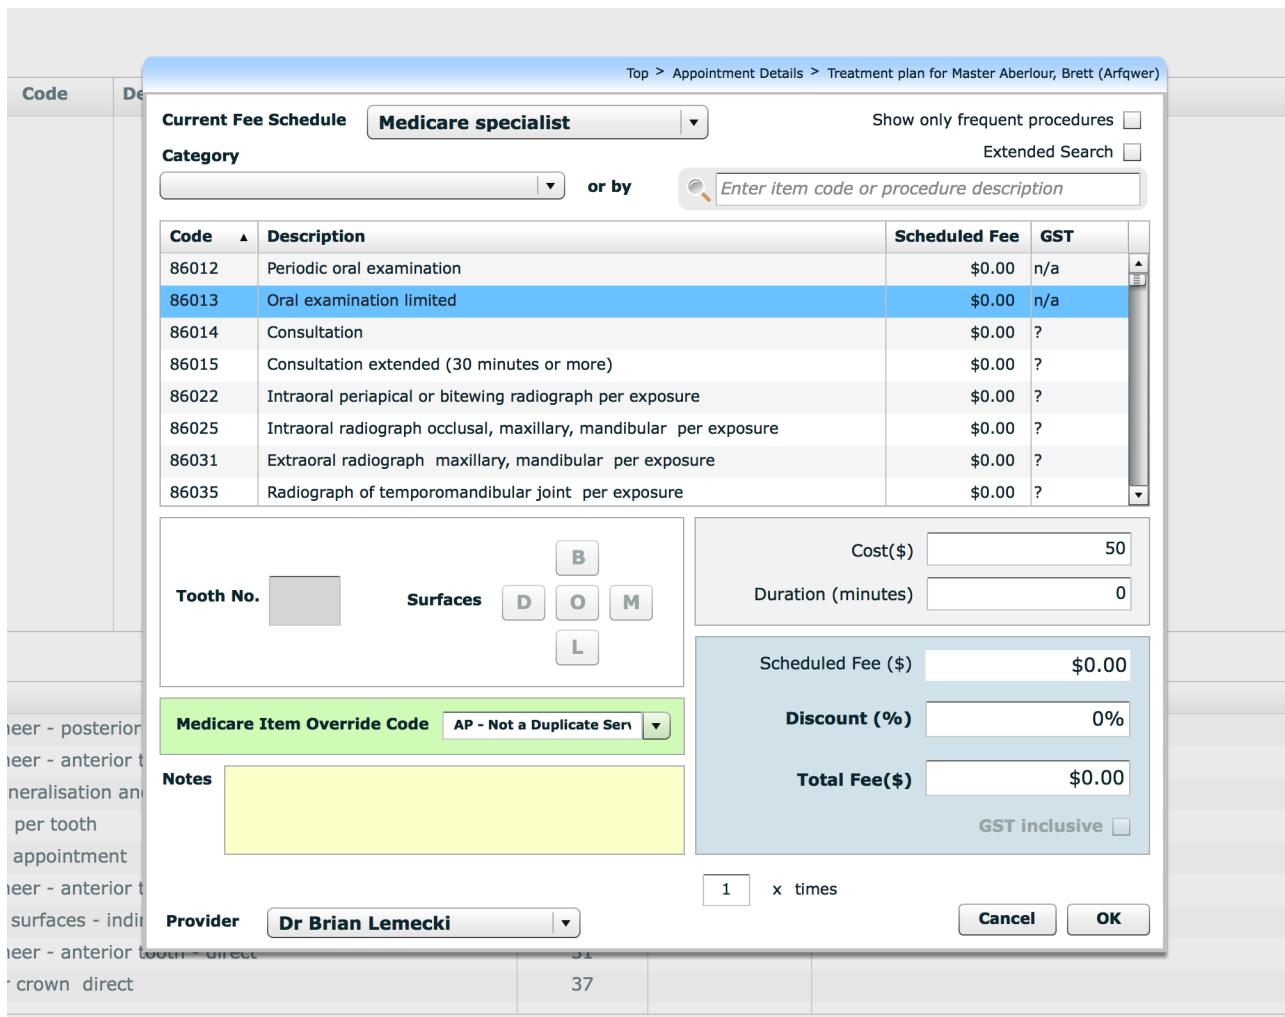

IMPORTANT: Medicare treatment procedures must have an index (code) that starts with 8 and has 5 digits. Standard ADA codes will be rejected during a Medicare Easy Claim.

6.2.3. Click "+" Button inside of the Appointment screen to add items.

6.2.4. Select the required procedure items from a Medicare Fee Schedule.

You can also specify Medicare Item Override Code in this screen if necessary. Press OK to confirm the item.

6.2.5. After all the treatment items are added to the Appointment, press "complete" button.
